

Name: Class:

Perimeter.

Find the perimeter of each figure below.

Name: Class:

Perimeter.

Find the perimeter of each figure below.

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides:

$$9\text{ m} + 6\text{ m} + 9\text{ m} + 6\text{ m} = 30\text{ m}$$

So, the perimeter is 30 m

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides:

$$7\text{ m} + 7\text{ m} + 5\text{ m} = 19\text{ m}$$

So, the perimeter is 19 m

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides :

$$5\text{ in} + 7\text{ in} + 7\text{ in} + 15\text{ in} = 34\text{ in}$$

So, the perimeter is 34 in

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides :

$$6\text{ ft} + 21\text{ ft} + 7\text{ ft} + 18\text{ ft} = 52\text{ ft}$$

So, the perimeter is 52 ft
