Estimate Sums and Differences Word Problems

a. Number of views the Instagram influencer had last month =1,510,210

Number of view she already has this month = 3,031,461

Therefore, the estimated number of views she has so far =

Number of views the Instagram influencer had last month +
Number of view she already has this month.

$$\begin{array}{r} 3,000,000 \\ + 2,000,000 \\ \hline 5,000,000 \end{array}$$

She has about 5,000,000 views.

b. They drove about 1,300 miles in all.

c. The library has about 250,000 books in all.

d. Aaron was left with about 800 bags of clothes.
