Time units

1. How many minutes are there in a year? (not a leap year)

2. How many seconds are in 1 minute?

3. How many years are in 3 decades?

4. How many minutes are there in 20 hours?

5. How many days are there in a month?

6. How many days are there in a year?

7. How many hours are there in a month?

Name: Class:

Time units

- 1. How many minutes are there in a year? (not a leap year)
we know that,
1 year = 365 days
1 day = 24 hours
1 hour = 60 minutes
Multiply the values on the left
So, one year = (365 x 24 x 60)minutes
= (8 760 x 60)minutes
= 525 600 minutes
Therefore, there are 525 600 minutes in one year.
- 2. Therefore, there are 60 seconds in 1 minute
- 3. Therefore, there are 30 years in 3 decades
- 4. Therefore, there are 1,200 minutes in 20 hours
- 5. Therefore, there are 30 days in a month
- 6. Therefore, there are 365 days in a year
- 7. Therefore, there are 720 hours in a month
