Adding two numbers up to seven digits word problems

a. Number of fruits picked after the first pass = 45,857,

Number of fruits picked after the second pass = 22,769.

Therefore, number of bananas Stephen picked =

number of fruits from the 1st pass + number of fruits from the 2nd pass.

$$
\begin{array}{r}
45,857 \\
+\quad 22,769 \\
\hline
68,626
\end{array}
$$

So, the workers picked 68,626 fruits.

b. They plan to produce 10,713,650 toys.

c. They received €11,023,072 in all.

d. The sum of the two numbers is 12,896,537
