Name: .... Class: ....

Write fractions in lowest terms.

Reduce the following fractions to its lowest form. (follow the example).

a. $\dfrac{35}{25} = $ ❓

Prime factors of 35 = ⑤ x 7
Prime factors of 25 = ⑤ x 5
GCF of 35 and 25 = 5

$\dfrac{35/5}{25/5} = \dfrac{7}{5}$

Therefore, 35/25 to its lowest term is 7/5.

b. $\dfrac{20}{12} = $ ❓

Prime factors of 20 = ② x ② x 5
Prime factors of 12 = ② x ② x 3
GCF of 20 and 12 = 2 x 2 = 4

$\dfrac{20/4}{12/4} = \dfrac{5}{3}$

Therefore, 20/12 to its lowest term is 5/3.

c. $\dfrac{16}{24} = $ ❓

Prime factors of 16 = ② x ② x ② x 2
Prime factors of 24 = ② x ② x ② x 3
GCF of 16 and 24 = 2 x 2 x 2 = 8

$\dfrac{16/8}{24/8} = \dfrac{2}{3}$

Therefore, 16/24 to its lowest term is 2/3.

d. $\dfrac{15}{18} = $ ❓

Prime factors of 15 = ③ x 5
Prime factors of 18 = 2 x ③ x 3
GCF of 15 and 18 = 3

$\dfrac{15/3}{18/3} = \dfrac{5}{6}$

Therefore, 15/18 to its lowest term is 5/6.
