Name: Class:

Percent of numbers: word problems

1. Use proportions to solve percent problems.
percentage of pupils that bring lunch to school = 80%.
Overall number of pupils in class = 50.
Therefore, the number of pupils that bring lunch to school = $80 \times 50 = 100 \times ?$
 $\rightarrow ? = \frac{80 \times 50}{100} = 40$
So, 40 pupils bring their lunch from home.

2. So, 7 women showed up for the interview.

3. So, Leo answered 12 questions correctly.

4. So, 16 students passed their test.

5. So, 15 peoples in the meeting were men.

6. So, 45 employees work in Mr. Peter's restaurant.

7. So, 18 animals in the animal shelter are stray dogs.
