

Name: Class:

Surface area of pyramids

Find the surface area of these triangular pyramid.

Find the surface area of these triangular pyramids. choose the correct answer

- 280.8 cm²
- 140.4 cm
- 280.8 cm
- 583.2 cm²

- 253.5 m²
- 174.2 m²
- 348.4 m²
- 180.65 m²

Name: Class:

Surface area of pyramids

Find the surface area of these rectangular pyramid.

$$\text{Area} = \frac{1}{2} \times 5 \times 7 = 17.5 \text{ in}^2$$

$$\text{Area} = \text{length} \times \text{width} = 7 \times 7 = 49 \text{ in}^2$$

Firstly, identify the different faces of the prism.
 → It has 4 triangular faces and 1 rectangular faces

Secondly, find the area of each face.

Finally, add the area of the 5 faces to get the surface area.

$$\text{Area} = \frac{1}{2} \times 5 \times 7 = 17.5 \text{ in}^2$$

$$\text{Area} = \frac{1}{2} \times 5 \times 7 = 17.5 \text{ in}^2$$

$$\text{Area} = \frac{1}{2} \times 5 \times 7 = 17.5 \text{ in}^2$$

$$\text{Surface area of prism} = (17.5 + 17.5 + 17.5 + 17.5 + 49) \text{ in}^2 = 119 \text{ in}^2$$

So, the surface area is 119 square inches.

Find the surface area of these triangular pyramids. choose the correct answer

280.8 cm²

140.4 cm

253.5 m²

174.2 m²

280.8 cm

583.2 cm²

348.4 m²

180.65 m²
