Division facts to 12: word problems

- a. Donna had 50 oranges. She divided them equally among 10 of her friends. How many oranges did Donna give to each friend?

Divide the total number of oranges by the number of friends.

$$50 \div 10 = 5$$

So, Donna gave 5 oranges to each friend.

- b. So, 8 crayons were in each group.
- c. So, John put 11 cookies in each box.
- d. So, each person got a bill of \$10.
- e. So, each monkey got 5 bananas.
- f. So, her brother got 5 presents.
- g. So, my friend scored 6 points.
- h. So, he puts 7 candles in each bathroom.
- i. So, 7 baseballs will be in each container.
- j. So, each person got 9 cupcakes.
