Name: Class:

Multiply three or more numbers, one of which is a decimal

Multiply the following.

a. $2 \times 14 \times 6 \times 1.31 =$

Let's first of all multiply the first 2 numbers.

$2 \times 14 = 28$

Secondly, we multiply 28 by 6 = 168.

Finally, we multiply 168 by 1.31 = 22008.

But there are 2 decimal places.

So, $22008 = 220.08$.

Follow the example above to solve and fill in the blank spaces below.
