Fractions review

1. Write the fraction that the number line below shows.

First of all, find how many parts the number line has been separated into.
It has 8 separate parts.

Secondly, let's number the number line.

Finally, write the fraction that falls on the indicated point.

So, the number line shows a fraction of $\frac{2}{8}$.

2. Write the fraction that the shaded part below shows.

First of all, count how many parts there are.

There are 8 parts.

Now count the number of shaded parts.

There are 4 shaded parts.

Finally, let's write down the fraction.

4 shaded parts out of 8 equal parts = $\frac{4}{8}$.

3. Write the fraction that the shaded part below shows.

8 shaded parts out of 12 equal parts $\frac{8}{12}$.
